Subject Index

Volume 5

Acid

Liming to restore acidified lakes and streams: a typical approach to restoring damaged ecosystems? (Schindler), 1 (Commentary)

Afforestation; see Forests

Airborne multispectral videography; see Video

Amur honeysuckle

Responses of understory species to gap formation and soil disturbance in *Lonicera maackii* thickets (Lukens et al), 229

Animals

Planning and implementing a reintroduction of wolves to Yellowstone National Park and central Idaho (Fritts et al), 7

Reestablishment of a rodent community in restored desert scrub (Patten), 156

Ants

Ants as indicators of restoration success: relationship with soil microbial biomass in the Australian seasonal tropics (Andersen and Sparling), 109

Aquatic lands; see Wetlands

Artemisia californica

Exotic grass competition in suppressing native shrubland reestablishment (Eliason and Allen), 245

Australia

Ants as indicators of restoration success: relationship with soil microbial biomass in the Australian seasonal tropics (Andersen and Sparling), 109

Smoke enhanced seed germination for mine rehabilitation in the southwest of western Australia (Roche et al), 191

Woodland restoration in the western Australian wheatbelt: a conceptual framework using a state and transition model (Yates and Hobbs), 28

Bauxite

Smoke enhanced seed germination for mine rehabilitation in the southwest of western Australia (Roche et al), 191

Biology

Restoration biology: a population biology perspective (Montalvo et al), 27735

Book reviews

California Rivers and Streams: The Conflict Between Fluvial Processes and Land Use, by Mount (Zamudio), 187

Evolution and the Aquatic Ecosystem: Defining Unique Units in Population Conservation, edited by Nielson (Hoelzer), 188

Land Restoration and Reclamation: Principles and Practice, by Harris et al (Niering), 272

Riparian Ecosystem Recovery in Arid Lands: Strategies and References, by Briggs (Stromberg et al), 271

The Significance and Regulation of Soil Biodiversity, edited by Collins et al (Lindemann), 100

Bottomlands

Reforestation of bottomland hardwoods and the issue of woody species diversity (Allen), 125

California

Applying a two-stage system to prioritize riparian restoration at the San Luis Rey River, San Diego County, California (Olson and Harris), 43

A comparison of approaches to prioritizing sites for riparian restoration (Kentula), 69

Genetic variation and reintroduction of *Cordylanthus maritimus* ssp. *maritimus* to Sweetwater Marsh, California (Helenurm and Parsons), 236

Restoring native perennial grasses to rural roadsides in the Sacramento Valley of California: establishment and evaluation (Bugg et al), 214

The role of GIS in selecting sites for riparian restoration based on hydrology and land use (Russell et al), 56

Catchment water; see Water

Commentary

Liming to restore acidified lakes and streams: a typical approach to restoring damaged ecosystems? (Schindler), 1

Community restoration ecology

Ecological theory and community restoration ecology (Palmer et al), 291

Cordylanthus maritimus

Genetic variation and reintroduction of *Cordylanthus maritimus* ssp. *maritimus* to Sweetwater Marsh, California (Helenurm and Parsons), 236

Correction

Vital landscape attributes: missing tools for restoration ecology (Aronson and Le Floch) (1996;4:375), 190

Crevasses, artificial

Constructed crevasses and land gain in the Mississippi River delta (Boyer et al), 85

Data management

Quantitatively evaluating restoration experiments: research design, statistical analysis, and data management considerations (Michener), 324

Deserts

Reestablishment of a rodent community in restored desert scrub (Patten), 156

Response of endangered desert fish populations to a constructed refuge (Winemiller and Anderson), 204

Ecosystem perspective

Restoration ecology and the ecosystem perspective (Ehrenfeld and Toth), 307

Editorials

Editorial (Allen and Niering), 1

Human-dominated ecosystems and the role of restoration ecology (Niering), 273

Endangered species

Response of endangered desert fish populations to a constructed refuge (Winemiller and Anderson), 204

England

Role of soils in determining sites for lowland heathland reconstruction in England (Clarke), 256

Erosion

Stabilization and erosion control value of oyster cultch for intertidal marsh (Meyer et al), 93

Eucalyptus camaldulensis

Restoration of catchment water balance: response of clonal river red gum (*Eucalyptus camaldulensis*) to waterlogging (Akilan et al), 101

Eucalyptus salmonophloia

Woodland restoration in the western Australian wheatbelt: a conceptual framework using a state and transition model (Yates and Hobbs), 28

Exotic grass; see Grasses**Exxon Valdez oil spill**

The Exxon Valdez oil spill: habitat protection as a restoration strategy (Weiner et al), 44

Fish

Prioritizing watersheds in Oregon for salmon restoration (Nehlsen), 25

Response of endangered desert fish populations to a constructed refuge (Winemiller and Anderson), 204

Flooding

Vulnerability of riparian vegetation to catastrophic flooding: implications for riparian restoration (Hawkins et al), 75

Flora; see Plants**Forests**

Biomass and nutrient accumulation during natural afforestation of iron-smelting slag (Smith et al), 56

Effectiveness of road ripping in restoring infiltration capacity of forest roads (Luce), 265

Reforestation of bottomland hardwoods and the issue of woody species diversity (Allen), 125

Responses of understory species to gap formation and soil disturbance in *Lonicera maackii* thickets (Luken et al), 229

Terrestrial invertebrate community

structures as an indicator of the success of a tropical rainforest restoration project (Jansen), 115

Genetics

Genetic variation and reintroduction of *Cordylanthus maritimus* ssp. *maritimus* to Sweetwater Marsh, California (Helenurm and Parsons), 236

Geographic information system

The role of GIS in selecting sites for riparian restoration based on hydrology and land use (Russell et al), 56

Grasses

Exotic grass competition in suppressing native shrubland re-establishment (Eliason and Allen), 245

Restoring native perennial grasses to rural roadsides in the Sacramento Valley of California: establishment and evaluation (Bugg et al), 214

Sawgrass seedling responses to transplanting and nutrient additions (Miao et al), 162

Grasslands

Native colonizing species and degraded land restoration in La Gran Sabana, Venezuela (Rosales et al), 147

Re-creating semi-natural communities: vacuum harvesting and hand collection of seed on calcareous grassland (Stevenson et al), 66

Role of legumes in release of successional arrested grasslands in the central hills of Sri Lanka (Ash-ton et al), 36

Habitat protection

The Exxon Valdez oil spill: habitat protection as a restoration strategy (Weiner et al), 44

Heathlands

Role of soils in determining sites for lowland heathland reconstruction in England (Clarke), 256

Herbicides

Soil ripping and herbicides enhance tree and shrub restoration on stripmines (Ashby), 169

Human-dominated ecosystems

Human-dominated ecosystems and the role of restoration ecology (Niering), 273 (Editorial)

Hydrology

The role of GIS in selecting sites for riparian restoration based on hydrology and land use (Russell et al), 56

Idaho

Planning and implementing a re-introduction of wolves to Yellowstone National Park and central Idaho (Fritts et al), 7

Information

Approximating nature's variation: selecting and using reference information in restoration ecology (White and Walker), 338

Insects

Ants as indicators of restoration success: relationship with soil microbial biomass in the Australian seasonal tropics (Andersen and Sparling), 109

Invertebrates

The flora and invertebrate fauna of abandoned limestone quarries in Derbyshire, United Kingdom (Wheater and Cullen), 77

Terrestrial invertebrate community structures as an indicator of the success of a tropical rainforest restoration project (Jansen), 115

Iron

Biomass and nutrient accumulation during natural afforestation of iron-smelting slag (Smith et al), 56

Lakes

Liming to restore acidified lakes and streams: a typical approach to restoring damaged ecosystems? (Schindler), 1 (Commentary)

Land gain

Constructed crevasses and land gain in the Mississippi River delta (Boyer et al), 85

Landfills

Restoration of woody plants to capped landfills: root dynamics in an engineered soil (Handel et al), 178

Landscape

A step toward a landscape approach in riparian restoration (Kentula), 2 (Preface)

Landscape ecology

Linking restoration and landscape ecology (Bell et al), 318

Legumes

Role of legumes in release of successional arrested grasslands in the central hills of Sri Lanka (Ashton et al), 36

Limestone

The flora and invertebrate fauna of abandoned limestone quarries in Derbyshire, United Kingdom (Wheater and Cullen), 77

Liming to restore acidified lakes and streams: a typical approach to restoring damaged ecosystems? (Schindler), 1 (Commentary)

Lonicera maackii

Responses of understory species to gap formation and soil disturbance in *Lonicera maackii* thickets (Luken et al), 229

Lowland heathlands; see Heathlands**Marshlands**

Genetic variation and reintroduction of *Cordylanthus maritimus* ssp. *maritimus* to Sweetwater Marsh, California (Helenurm and Parsons), 236

Stabilization and erosion control value of oyster cultch for intertidal marsh (Meyer et al), 93

Using tidal salt marsh mesocosms to aid wetland restoration (Callaway et al), 135

Microbes

Ants as indicators of restoration success: relationship with soil microbial biomass in the Australian seasonal tropics (Andersen and Sparling), 109

Mining

Smoke enhanced seed germination for mine rehabilitation in the southwest of western Australia (Roche et al), 191

Soil ripping and herbicides enhance tree and shrub restoration on stripmines (Ashby), 169

Mississippi River

Constructed crevasses and land gain in the Mississippi River delta (Boyer et al), 85

Models

The scale of successional models and restoration objectives (Parker), 301

National Center for Ecological Analysis and Synthesis

Special issues: papers from NCEAS Restoration Biology Workshop (Allen), 273

Nutrients

Biomass and nutrient accumulation during natural afforestation of iron-smelting slag (Smith et al), 56
Sawgrass seedling responses to transplanting and nutrient additions (Miao et al), 162

Oil spill

The *Exxon Valdez* oil spill: habitat protection as a restoration strategy (Weiner et al), 44

Oregon

Prioritizing watersheds in Oregon for salmon restoration (Nehlsen), 25

Oyster cultch

Stabilization and erosion control value of oyster cultch for intertidal marsh (Meyer et al), 93

Perennial grasses; see Grasses**Plants**

The flora and invertebrate fauna of abandoned limestone quarries in Derbyshire, United Kingdom (Wheater and Cullen), 77

Genetic variation and reintroduction of *Cordylanthus maritimus* ssp. *maritimus* to Sweetwater Marsh, California (Helenurm and Parsons), 236

Native colonizing species and degraded land restoration in La Gran Sabana, Venezuela (Rosales et al), 147

Responses of understory species to gap formation and soil disturbance in *Lonicera maackii* thickets (Luken et al), 229

Restoration of woody plants to capped landfills: root dynamics in an engineered soil (Handel et al), 178

Population biology

Restoration biology: a population biology perspective (Montalvo et al), 277

Rainforests

Terrestrial invertebrate community structures as an indicator of the success of a tropical rainforest restoration project (Jansen), 115

Reference information

Approximating nature's variation: selecting and using reference information in restoration ecology (White and Walker), 338

Reforestation; see Forests**Research**

Quantitatively evaluating restoration experiments: research design, statistical analysis, and data management considerations (Michener), 324

Restoration biology: a population biology perspective (Montalvo et al), 277

Restoration biology/ecology

Approximating nature's variation: selecting and using reference information in restoration ecology (White and Walker), 338

Developing the conceptual basis for restoration ecology (Allen et al), 275

Ecological theory and community restoration ecology (Palmer et al), 291

Human-dominated ecosystems and the role of restoration ecology (Niering) (Editorial), 273

Linking restoration and landscape ecology (Bell et al), 318

Quantitatively evaluating restoration experiments: research design, statistical analysis, and data management considerations (Michener), 324

Restoration biology: a population biology perspective (Montalvo et al), 277
